## **DETAILED ACTION**

### ***Specification***

The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: the embodiments of claim 2 are not supported in the specification or drawing (claim 2 is being treated as dependent upon claim 1, since it would not make any sense as an independent claim).

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 2 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The preamble of claim 2 defines an independent claim, however the body of the claim implies that the claim should be dependent upon claim 1.

### ***Allowable Subject Matter***

Claims 1,3-7 are allowable over the prior art of record.

Claim 2 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Art Unit: 1744

The prior art of record fails to teach or suggest an oligosaccharide synthesizer comprising the combination of elements defined in claims 1,2, and 4.
